## GREETINGS FROM KDC DENTAL ACADEMY

### Opportunity To Become The Most Successful Clinician

KDC, launched in 1997 is a pioneer organization in the field of dentistry & has become the best finishing dental school for all aspiring dentist. Under the eminent leadership of Dr.Niranjan Paramshetty & Dr. Bhagyalaxmi Fouzdar have trained more than 1500 dentists all across the world. Our curriculum is purely practical based and clinical oriented. Our mission is to develop new generation of highly skilled dentists. After extensive preclinical training in our academy, the doctors are posted in our various charitable centers wherein they are going to perform all the dental procedures under supervision of the specialists.

#### This course is for:

- Beginners in private practice
- For getting excellent job placement
- Already practicing dentists to increase the bottom line of practice and to become masters in private practice

#### Speciality of our Course

- Our faculty comprises of MDS staff from all specialties and also senior successful private practitioners who have treated lakhs of patients. With their vast experience they will be sharing their success and mistakes/challenges faced and how to overcome them.
- The infrastructure includes air conditioned classroom with multimedia projector and good audio visual aids. State of art phantom head lab and demo room
- All the modern equipment like RVG, laser units, Intraoral scanner, apex locator, loupes, endomotors, CBCT, physio dispensers, OPG, phantom head lab, centrifuge machine etc.
- Full-fledged pantry team wherein breakfast, lunch, high tea & dinner will be provided.
- Accommodation facility available for boys and girls separately and also for the people who come with family.
- Field of dentistry is such a noble profession and has got lot of potential if done professionally. There are more than 500 treatment modalities in dentistry. If unaware of a single treatment, you are bound to loose lakhs of rupees across your career and the patient is also deprived of best treatment.(for e.g. Laser assisted surgeries, smile designing, depigmentation, lip repositioning, teeth whitening by lasers, PET in dental implants, hemi section, apicectomy, myofunctional appliances, fracture management, precision attachment etc ).

Apart from domain skills we also train soft skills, communication skills, patient management skills, revenue generation, ethical promotion, mass awareness, philanthropy, private practice set-up, management of medical emergencies. In short, this course is designed to provide dentists with an organized and structured educational program in a format that has something to offer for everyone.
